Art Unit: 2863

DETAILED ACTION

This application has been examined. Claims 1-32 are pending.

Drawings

The drawings are objected to under 37 CFR ' 1.84 for the reasons set forth by the draftsman. See attached PTO-948 form for details. Correction is required.

Direct any inquires concerning drawing review to the Drawing Review Branch (703) 305-8404.

Specification

Applicant is reminded of the proper language and format of an Abstract of the Disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said", should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The abstract of the disclosure is objected to because the word "disclosed" has

Art Unit: 2863

been using. Correction is required. See MPEP '608.01(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-5, 12-16 and 23-27 rejected under 35 U.S.C. 102(e) as being anticipated by Hass et al. (U.S. Patent No.6,330,977).

With respect to claims 1, 12, and 23, Hass et al. disclose an electronic labeling systems and method and electronic card system and methods including the step of automatically detecting an insertion of an integrated circuit device into the receptacle device (see e.g. col. 10, lines 10-17) and in response to a detection of an insertion of the integrated circuit device into the receptacle device, automatically incrementing an insertion count (see e.g. col. 8, lines 46-56 and col. 62, lines 61-64).

With respect to claims 2-5, 13-16, and 24-27, Hass et al. disclose the invention as claimed including an insertion of an MCM assembly into a planar (see e.g. col. 70, lines 37-39), interposer (see e.g. Figs. 40A-41C) and print circuit board (see e.g. Figs. 52A-53C).

Art Unit: 2863

Allowabl Subject Matter

1. Claims 6-11, 17-22 and 28-32 objected to as being dependent upon a rejected

base claim, but would be allowable if rewritten in independent form including all of the

limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to examiner Hien Vo, whose telephone number is

(703)308-5253. The examiner can normally be reached on Monday-Friday from 9:30

AM-5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, John Barlow, can be reached on (703)308-3126.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

Washington, D.C. 20231

or faxed to:
